2. Status of ticket
3. Amount of tickets
4. Ticket details - date

### v) Payment -

1. Type of payment
2. Payment portal
3. Payment details
4. Receipt details

Railway Reservation System is a system used for booking tickets over internet. Any customer can book tickets for different trains. Software has to be developed for automating the manual reservation system of railway. The system should be standalone in nature. It should be designed to provide functionalities like booking of tickets in which a user should be able to apply for tickets of any train of any class.
